Inexpensive farm fence for turning livestock. Thick fast growing plants require little care.

Attractive plants grow 6 to 8 ft. tall, provide nesting areas and berries for game food.

An abundance of white flowers each spring.

ROSA MULTIFLORA The Miracle Living Fence

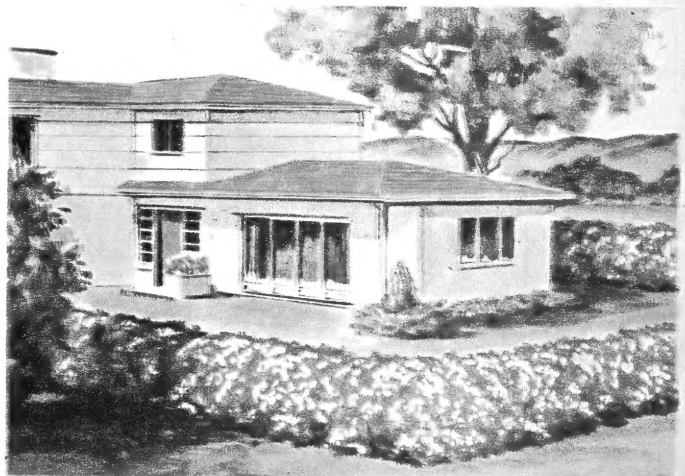

3H1 — Protect and beautify your property. A cheap, practical fence that grows so dense no person or animal can get through.

The plants grow 6 to 8 ft. tall and 5 to 7 ft. wide, are tough and fast growing. Covered with a multitude of white flowers in spring; loaded with attractive red berries in fall and winter which provide food for wild life. Also excellent for game protection and propagation.

Recommended by U. S. Soil Conservation service for livestock farm fence and for factories, parks, estates, institutions, residences, etc. that wish to keep animals and tres-

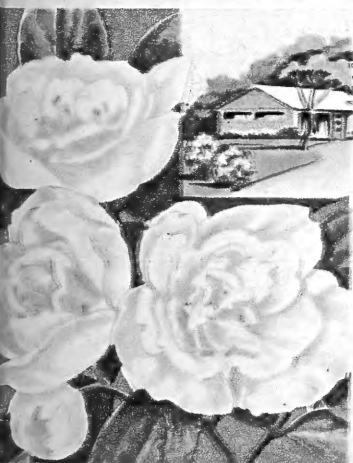

passers off their property. Present recommendation by U.S.D.A. is to plant 1 ft. apart in a single row for stock tight fence. Ornamental hedges can be planted 18 inches apart and kept trimmed to desired height. Trial fences planted throughout east, west and south have proven successful. North of Milwaukee there is danger of winter injury. The general use of *rosa multiflora* is just beginning but its value is proven for cheap fence, game management, property protection, windbreaks and erosion control to soil and crops. Will last for generations.

Excellent hedge for city boundary lines. Can be trimmed to any desired height.

HUGE BLUEBERRIES

New large fruiting varieties introduced by U. S. D. A. are the best blueberries in existence. Grow your own for pies, canning and eating. Big crops, easy to pick berries that have a sweet, mild flavor. Many people say blueberries can only be grown in acid or sour soils. It is no trick to grow good blueberries if you make the soil acid. Blueberries like an abundance of peat, oak leaves, pine needles or any acid organic matter. Mix soil thoroughly with aluminum sulfate if soil is sweet. We send sufficient aluminum sulfate with each order for 1st year. Plant no less than two varieties for pollination. Plants grow a life time and are beautiful for landscaping any yard.

WEYMOUTH 11F10—Early ripening.

STANLEY 11F11—Mid-season ripening.

PEMBERTON 11F12—Late ripening.

ACID PEAT MOSS FOR BLUEBERRIES 11PM14—Blueberries prefer acid soil with abundance of organic matter as peat. Highest Horticulture Acid peat, especially recommended. \$1.00 per bag; 3 bags \$2.50.

ALUMINUM SULPHATE 11AS15—Mixed with peat helps to grow giant blueberries. One pound enough for 2 to 4 plants per year. 40c pound; 5 pounds \$1.75.
